## 2. Air arrivals by airports and purpose of travel

Year ending January 2017

### 3. Air arrivals by airports and key rental vehicle markets

Air arrivals are displayed below for the top ten markets for rental vehicles, based on the volume of visitors making a hire over the past five years. Also included are the shares of each market this represents, which indicate each market's propensity for making a rental car hire.

## Year ending January 2017

## Notes and methodology

---

Overseas Arrivals & Departures data are released by the Australian Bureau of Statistics on a monthly basis, approximately five weeks after the reference month. Data are collected from incoming and outgoing passenger cards, of which a sample is processed each month to provide information about the mix of visitors by purpose of trip and origin country.

Since only a sample is processed, caution should be exercised in interpreting data for cells with 2,000 or fewer movements, as relative standard errors are greater than 10%. Cells with 400 or fewer movements and corresponding cells from other periods will not be presented, as relative standard errors are greater than 25%.

These values differ (and indeed are better than) aviation passenger data produced by the Bureau of Infrastructure, Transport and Regional Economics (BITRE), as those data are unable to distinguish between international passengers arriving and Australians returning from an overseas trip. Data included in this report show international arrivals who intend to stay in Australia for less than 12 months (this definition accords with the United Nations World Tourism Organization (UNWTO) definition of a 'tourist').

Four tables are presented. The first two tables show international arrivals and departures from all markets. The third table shows international arrivals from all markets by airport based on purpose of visit. The fourth table shows arrivals by the top ten markets for the vehicle rental sector. Note in this table the 'total' is the sum of those ten markets and not the total arrivals into that airport (which is presented in Table 3).

**NB:** The ABS revised its Overseas Arrivals & Departures data in October 2014 to improve data quality. While historical revisions have been made to data presented here, this edition should not be compared to *TTF Overseas Arrivals Summary by Airports & Key Markets* reports published prior to October 2014.
